Eco-Wood

The uniqueness of Eco-Wood playgrounds is sought after by Architects, community designers, and park and recreation districts looking to make a statement with their public space by providing play opportunities with a one-of-a-kind look. Based on the classic style of your playground in the 1980s and 1990s, Eco-Wood delivers a retro appearance with state-of-the-art materials with a proven performance record that results in a natural-looking playground without the costly and laborious maintenance of a wooden playground.

Capacity: 46-50
Use Zone: 57'-7"×33'-1"
Fall Height: 8'-0"

Colors:

Eco-Wood playgrounds utilize premium materials that have been proven by time to hold up to the elements and graciously take all of the strain and exertion dished out by adventurous and hard-playing kiddos. The thoughtful placement of slides and climbers provides multiple play avenues that our children can choose. And the sharp color palette introduces a measured and intentional splash of color without going overboard, perfect for natural and subtle spaces. Combine the uniqueness of Eco-Wood with similar free-standing play components to create a wonderful and long-lasting playground for your community.

The large, sturdy Eco-Wood platforms can comfortably accommodate large volumes of kiddos without constricting enthusiasm. The rugged 4x4 extruded aluminum posts anchor the play in place and provide sturdy connection points for all play activities. The Eco-Wood posts are printed with the dye sublimation to simulate wood grain. They capture the look of wood while employing the strength and durability of the heavy gauge aluminum support. The metal gates and climbers are constructed with a heavy gauge, rust-resistant

stainless steel. The flat sheet plastics used for the colorful barriers, icons, post toppers, and roofs are formed from fade-resistant HDPE. In contrast, the 3D plastic slides and climbers are rotationally molded using a virgin, compounded resigns to ensure the best UV resistance and long-lasting products. The wood-like barriers, decks, and roofs are crafted from a highly dense compact laminate and are laser cut to precision. This material resists corrosion, dents, scratches, and combustion and remains stable with UV exposure.

Treehouse playgrounds bring the forest to your playground with natural and life-like, themed based play components that allow you to create a playground that takes on the appearance of a wild forest. With its large supports, broad platforms and a natural color palette to choose from, a TreeHouse playground can be the focal point of your family park. This system is designed to handle large end user volumes without constricting the excitement and enthusiasm found in the flow of play. The time-tested reliability of the materials sourced for and combined with the skilled craftsmanship at the factory, produces equipment that is durable and requires less maintenance over time, so that your play space remains fun, inviting and open to the public.

Treehouse playgrounds are artistically crafted with your choice of 5.0" OD galvanized steel or aluminum support posts which are coated with a baked-on polyester powder coated finish for a lifetime of protection against the elements. All handrails, gates and barriers are fabricated with stainless-steel tubing. All steel decking and stairs are encased in a long-lasting PVC coating.

The realistic treehouse, panels, climbers and roofs are environmentally friendly high-molecular carbon fiber materials. The three-dimensional plastic slides and toppers are rotationally molded using virgin compounded resins that feature greater UV breakdown resistance over dry blended resins. The HDPE sheet plastic climbers and activities are specifically manufactured at the factory for high-quality control and not purchased from a supplier.

Minimo

Playgrounds designed with Minimo tend to be a great solution for religious organizations, daycares, multi-family housing, and schools and organizations that want to enhance their facility with a play space. Typically, these playgrounds need to provide lots of activity in a small or medium-sized space, and the cost of purchasing, shipping and installation needs to be very reasonable.

Octofundus

KP-22010

Age Group: 5-12
Activities: 20
Capacity: 55-59
Use Zone: 50'-9"×47'-9"

Fall Height: 8'-0"

Colors:

Minimo playgrounds offer you features such as a slightly smaller footprint than standard equipment. This smaller footprint accommodates smaller play spaces with more activities without sacrificing safety or durability. In addition to providing big play in smaller spaces, you will also enjoy lower equipment cost, shipping cost, and surfacing cost that one experiences with standard-sized playgrounds.

Minimo playgrounds are skillfully crafted with your choice of 3.5" OD galvanized steel or aluminum support posts which are, along with all of the steel handrails, barriers, gates, and climbers, coated with a baked-on polyester powder coat finish for a lifetime of protection against the elements. All steel decking and stairs are encased in a long-lasting PVC coating. The three-dimensional plastic slides, panels, roofs, and climbers are rotationally

molded using virgin compounded resins that feature greater UV breakdown resistance than dry blended resins. The HDPE sheet plastic climbers and activities are specifically manufactured at the factory for high-quality control and not purchased from a supplier.

NEXUS

NEXUS style playgrounds offer unique solutions for organizations that have curvy and bendy spaces that traditional, squared-off playgrounds cannot accommodate efficiently.

Also, organizations such as schools, municipalities, cities and park districts that are seeking to reduce risk but provide exceptional activity will want to research Nexus playgrounds

Vivacious Llama

NX-24050

Age Group: 5-12
Activities: 15
Capacity: 26-32
Use Zone: 57'-5"×38'-4"

Fall Height: 7'-8"

Colors:

NEXUS playgrounds offer you features such as design flexibility and a compact footprint that you don't get with traditional post and platform styles of playground equipment. Safety and durability are standards in every KidsTale playground, and Nexus augments those traits by removing platforms and keeping all of the activities at or very near to ground level. By removing the platform requirements from a playground, you will enjoy high action play, inventive play at low levels of risk as well as lower equipment cost, shipping cost, and surfacing cost that one experiences with traditional post and platform style playgrounds.

NEXUS playgrounds are skillfully crafted with 4.0" OD galvanized steel posts which are, along with all of the steel handrails, barriers, gates, and climbers, coated with a baked-on polyester powder coat finish for a lifetime of protection against the elements. The three-dimensional plastic slides, panels, and climbers are rotationally molded using virgin compounded resins that feature greater UV breakdown resistance than dry blended resins. The HDPE sheet plastic climbers and activities are specifically manufactured at the factory for high-quality control and not purchased from a supplier.

Playgrounds designed with Maximo are favorable solutions for organizations, such as park districts, city boards, and large school districts with large spaces and high end-user volumes. These types of play spaces frequently need to provide exciting play with safety, low maintenance, a higher child capacity to handle the volume, and a larger footprint that complements the flow of play.

All playground equipment must be installed over an accessible impact attenuating surface.

Inclusive Play

Enterprises like park and recreation organizations, city boards, Landscape Architects, and mission-focused not-for-profits recognize the scarcity of play spaces where everyone can participate to the best of their ability. The spirit of accessible playgrounds can often fall short of an inclusive playground by only following the letter of the design standard.

All Inclusive playgrounds are accessible, but not all accessible playgrounds are inclusive. And when you are designing an inclusive playground, you're not just designing for the children. You must also accommodate the parents and caregivers of various abilities as well. Following some fundamental principals, an inclusive playground will ensure that everyone can access the best play activity on the playground. Be it a spiral slide or a crazy spinner or a web climber; everyone can reach the entrance and exit points. Another element is co-locating various kinds of the same type of activity so that someone someone who has limited physical abilities can enjoy the same activity as the person close to them on a similar but perhaps more challenging activity. We can all play together.

Inclusive playgrounds are artistically crafted with your choice of 5.0" OD galvanized steel or aluminum support posts which are, along with all of the steel handrails, barriers, gates, and climbers, coated with a baked-on polyester powder coat finish for a lifetime of protection against the elements. All steel decking and stairs are encased in a long-lasting PVC coating. The three-dimensional plastic slides, panels, roofs, and climbers are rotationally molded using virgin compounded resins that feature greater UV breakdown resistance over dry blended resins. The HDPE sheet plastic climbers and activities are specifically manufactured at the factory for high-quality control and not purchased from a supplier.

Theme Play

Many organizations like park and recreation districts, city councils, Landscape Architects, and even some school districts desire a play space that stands out from the other local playgrounds. You are looking for something that will attract families and create a community play space that will create cherished memories.

Colors:

Theme Play playgrounds furnish themed based play components that give you the opportunity to create a playground that mimics a castle, a sailing ship, a wild west fort or a space station. With its large supports, broad platforms and a wide spectrum of colors to choose from, a Theme Play playground can be the focal point of your family park. Based on Maximo, this system can handle end-user volumes without constricting the excitement and enthusiasm found in the flow of play. The time-tested reliability of the materials sourced for and combined with the skilled craftmanship at the factory, produces equipment that is durable and requires less maintenance over time, so that your play space remains fun, inviting and open to the public.

Theme Play playgrounds are artistically crafted with your choice of 5.0" OD galvanized steel or aluminum support posts which are, along with all of the steel handralls, barriers, gates, and climbers, coated with a baked-on polyester powder coat finish for a lifetime of protection

against the elements. All steel decking and stairs are encased in a long-lasting PVC coating. The three-dimensional plastic slides, panels, roofs, and climbers are rotationally molded using virgin compounded resins that feature greater UV breakdown resistance over dry blended resins. Toddler Town

Toddler Town

Providing fun, safe and cost-effective playgrounds for toddlers and preschools for religious organizations, daycares, and schools can be very challenging. Typically, these playgrounds need to provide lots of activity in a small or medium-sized space, and the cost of purchasing, shipping and installation needs to be very reasonable.

Creative Condo

TT-24120

Age Group: 2-5 Activities: 8 Capacity: 15-20 Use Zone: 19'-5"×19'-5" Fall Height: Ground Level

Colors:

Toddler Town playgrounds offer you elements such as an abundance of ground-based play that focuses on cognitive learning, fine motor skills, as well as a social quality. These elements are furnished to you in a slightly smaller footprint to accommodate smaller play spaces and that facilitate an excellent line of supervision. In addition to providing big play in smaller spaces, you will also enjoy lower equipment cost, shipping cost, and surfacing cost that one experiences with standard-sized playgrounds.

Toddler Town playgrounds are skillfully crafted with your choice of 2.375" OD galvanized steel or aluminum support posts which are, along with all of the steel handrails, barriers, gates, and climbers, coated with a baked-on polyester powder coat finish for a lifetime of protection against the elements. All steel decking and stairs are encased in a longlasting PVC coating. The three-dimensional plastic slides, panels, roofs,

and climbers are rotationally molded using virgin compounded resins that feature greater UV breakdown resistance than dry blended resins. The HDPE sheet plastic climbers and activities are specifically manufactured at the factory for high-quality control and not purchased from a supplier.

Q-Fitness Q-Fitness

Q-Fitness

Many organizations like park and recreation districts, city councils, Landscape Architects, are looking for ways to create multi-generational outdoor spaces. Space that provides activity and entertainment for a broad spectrum of users in an outdoor environment so that individuals can get away from technology and reconnect with our natural surroundings.

Q-Fitness takes outdoor-based physical fitness far beyond the old fashloned pull-up and sit-up stations that haunt our parks and green spaces. Q-Fitness is a response to what adults are seeking to live a healthy lifestyle. Thirty-Three ultra-durable, multi-user stations offer designers a wide range of activities to meet the needs of your community. Stations can be configured in groups or strung out along a trail to provide a challenging and rewarding experience.

Q-Fitness stations are expertly crafted to be lowmaintenance with 5.0" OD galvanized steel supports which are, along with all of the steel handrails, barriers, gates, and climbers, coated with a baked-on polyester powder coat finish for a lifetime of protection against the elements.

The HDPE sheet plastic platforms and activities are specifically manufactured at the factory for highquality control and not purchased from a supplier.

Warranty

Design and Raw Materials

Every story has a beginning. The product quality story begins with a measured and thoughtful design. A team of highly talented and experienced playground designers will transform your ideas into functional pieces of play. Once designed, using our stringent standards, we source the highest quality steel, weld wire, composite plastic resin, and HDPE resin for a long-lasting and low-maintenance playground.

Fabrication and Production

KidsTale continuously invests back into the company. To exceed the high standards and expectations set by the North American playground market, a new facility and significant renovations to our existing facility have been completed. Experienced and highly skilled personnel are at the heart of our production efforts. They facilitate the art of production using hi-tech equipment such as robotic saws, presses, welders to craft precision parts that are, in turn, assembled to create your ideal play space.

Coating and Finishing

Once fabrication is completed with the steel components, the parts move to the painting department. There, an additional inspection while being hung on our new paint line. Each part is thoroughly washed here, so dust and tiny metal shavings do not contaminate the finish coating. Then each piece is meticulously coated with a fine poly powder coating. This powder coating is then baked onto each part, creating a seal that dramatically slows down the natural corrosive properties of nature.

Packing and Shipping

To ensure your playground arrives on-site in the same condition as it was when manufactured, each piece is carefully wrapped in a renewable and recyclable cotton blanket, and a color-coded shipping label is applied. The part is staged to be loaded on a container. The shipping department takes great care in loading each container, so your playground arrives undamaged at the distribution warehouse, where your order is carefully sorted and created, and loaded on a truck destined to your site.

KIDSTALE WARRANTY

- One Hundred Year (100) Limited Warranty on aluminum and steel upright posts against structural failure due to deterioration, comosion or workmanship.
- -One Hundred Year (100) Limited Warrenty on hardware against structural failure due to deterioration, corrosion or workmanship
- -One Hundred Year (100) Limited Warranty on post caps and clamps against structural failure due to deterioration, corrosion or workmanship.
- -Fifteen Year (15) Limited Warranty on rails, rungs, rigid climbers, loops and decks against structural failure due to deterioration, comosion and workmanship.
- -Fifteen Year (15) Limited Warranty on all HDPE and rotational molded plastic components against structural failure due to materials or workmanship.
- -Three Year (3) Limited Warranty on all blow molded plastics against structural failure due to materials or workmanship.
- -Three Year (3) Limited Warranty on Child Center and Tree Center units, all models.
- -Five Year (5) Limited Warranty on cables and nets against premature wear due to natural deterioration or manufacturing defects.
- -Five Year (5) Limited Warranty on moving parts against structural failure due to materials or workmanship.
- -One Year (1) Limited Warrenty on all materials and products not covered above against failure due to materials or workmanship.

KIDSTALE warrants to its original customer for as long as the original customer owns the product and uses the product with normal use and irestallation in accordance with published specifications to be free from defects in materials and workmanship

This warranty does not cover damage from misuse, vandatism, modified parts or damage such as dents, scratches, fading/weathering and normal wear and tear. Warrenty claims must be filed within the applicable warrenty period. Warrenty replacement does not include the cost of labor for part replacement. Replacement parts carry the applicable warranty from the date of shipment of the replacement part.

ISO 9001

An industry certification process issued by the International Organization for Standardization. It is used to measure manufacturing standards and to certify company compliance with quality control systems covering design. development, production, installation, inspection and testing.

ASTM

ASTM International is an independent and world renowned developer of technical standards utilized in leating a multitude of products. ASTM's F15,29 committee met regularly for over a decade in the continuel development of the F1457 Standard Consumer Safety Performance Specifications for Playground Equipment for Public Use. The original standard, F1457-93 was published in 1993 and subsequently replaced by the current version ASTM F1457-11, published November 2011

Qitele Group is a member in good standing of IPEMA, the International Play Equipment Manufacturers Association. IPEMA is a member-driven, international trade organization that represents and promotes an open market for manufacturers of play equipment.

In the inferest of playground safety, the international Play Equipment Manufacturers Association (IPEMA) provides a Third Party Certification Service whereby a designated independent laboratory, Detroit Teeting Laboratory, Inc., (DTL), validates an equipment manufacturer's certification of conformance to ASTM F1487, Standard Consumer Safety Performance Specification for Playground Equipment for Public Use, except sections

7.1.1, 10 and 12.6.1; to GANICSA 2614, Children's Playspaces and Equipment, except clauses 9.8, 10 & 11; or both. The use of the corresponding logo in Citale Group's catalog signifies that Citele Group has received written validation from the independent laboratory that the product(s) associated with the use of the logo conforms to the requirements of the indicated standard. Check the IPEMA website (www.lpems.org) to confirm product validation."

The Consumer Product Safety Commission is an independent agency within the United States Federal Government with the authority to inform the public of current product safety performance information and recommended practices. The CPSC first published their guidelines for public playgrounds in 1981 and have updated their publication several times since then. The current CPSC Handbook for Public Playground Safety, publication #325, is an excellent guide for owners and operators of public play environments
